

Schenectady, N. Y., May 5, 1921.

Mr. William Hill,
Bolton,
Lake George, N. Y.

Dear Mr. Hill:

Having failed to obtain a bill from Mr. Barber or yourself covering my indebtedness for the slate which he kindly allowed you to have for my camp last Fall, I am enclosing a check for fifty dollars (\$50.) with the hope that you will be able to pay off my indebtedness in whole or in part and let me know what I should do further in the matter. I asked Mr. Wood over the 'phone on Monday if he would be good enough to have you stone up the cesspool and cover it over securely. I want to lessen the possibility of anyone falling in and also get the job completed. It might be well to have one place that could be dug up and opened for inspection later since it is my idea that it might be desirable to drain this reservoir into another in the event that the seepage of this one is not as good as it should be.

I intended putting the lumber under cover but was too busy this week-end and I would ask that in the event that you do not have time to use part of it for the porch in the next few days that you be good enough to put all of it in the boat-house or cover it up where it is now piled. The warm weather and rain will soon cause the boards to warp.

Mr. Dalton expressed a desire to get rid of the stones that were piled up near his place and you may find it desirable to have these hauled over and the team could profitably put in a full half-day and bring down a few loads from the upper boat for the shore between the two camps. I find the dirt is washing out at high water faster than I can put it in.

With best regards and hoping to see you this week-end, I am

Very truly yours,

Schenectady, N. Y., May 16, 1921.

Mr. William Hill,
Bolton,
Lake George, N. Y.

Dear Mr. Hill:

After talking with you about the plumbing, it occurred to me that I would like to have arrangements made for a sink and hot and cold water in the kitchen, located about where the shingles are stacked and this may affect the location of the heater. I also want to mention that there are some plumbing fixtures in my tool box belonging to the bath tub.

If you have time I would like to get the bath room ceiled on the outside, i.e. boards nailed on the uprights on the side of the kitchen and hall. You will, no doubt, find plenty material in the boat house and possibly there might be enough of the sheeting which you had last week left over from the floor at least to cover the end next to the entrance. The door you will probably find in the upper part of the wood house.

With best regards and hoping to see you this week-end

Very truly yours,
